

## Print

**Document structure:** Please apply the Document in an „open“ file at standard 1:1 and with 3 mm trim. Save pictures in CMYK mode without compression, place them and also supply them. The resolution of the picture data should not be less than 300 dpi at trimmed size in order to guarantee a pixel-free design. If possible, the fonts should always be turned into vectors. In case this is not possible, please supply the complete font. (If necessary, please ask for the punch outline as illustrator file)

### The following programs (PC) can be used:

Adobe Creative Suite: Illustrator, InDesign, Photoshop, Acrobat (PDF)

**Note:** If you send a complete EPS / High End PDF, please do not forget the trim, the correct resolution, the right definition of colours and the fonts turned into vectors.

**Definition of colours:** In order to guarantee the exact display of the colours we need a binding coloured template or colour references like Pantone or HKS.

**Die-cutting forms :** As soon as we receive your order, you will receive all die-cutting forms from us for direct data integration.
